

Well maintained highway infrastructure workshop

Join us on 28 March for an all day workshop to be led by Atkins which will assist MHA members to develop a common understanding, a model action plan towards implementing the new Code of Practice and a risk-based approach for their highway network.

MHA members have expressed strong interest in this event – so we will manage bookings to ensure a fair distribution across the MHA membership.

The workshop agenda will include:

- Introduction to the new Code of Practice and review of recommendations
- Consideration of which recommendations should be started within the next 3 months, started within 2017/18 or reviewed within 2018/19
- Introduction to the risk based approach
- Prioritisation of areas to address within agreed timescales
- Identification of key stakeholders; methods for engagement
- Sources of evidence and their location that will be required
- Sharing of good practice between authorities
- Agree next steps, areas of potential collaboration, and development of implementation plans

Tuesday 28 March 2017
